Chicago Training Seminar Meets with Rave Reviews...

Approximately 40 contractors settled themselves in for a long day packed with information! Having both Fortress and Emecole team up for this training session it was definitely entertaining as well as informative. There was always something to see and learn about. We will surely have to do this again. With so many requests and many installers coming back for more, we are looking into adding an additional day to the next training session. Yes believe it or not some want more work!! To inquire about future training sessions please email us at solutions@fortressstabilization.com

The Power of Your Websites

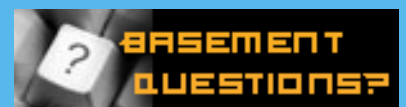

Thank you to those installers who have worked on updating their websites this past month. We received so many phone calls from companies to find out if they lost a lead. This is a very competitive day and age with internet friendly homeowners. They do their research. A good presentation and representation of your company is more important than ever before.

We will continue to strive to bring you the best possible products, installation support and training to help you succeed over and above your competition.

Sincerely,
Fortress Stabilization Systems

You will also find an insert ready Fortress page for your convenience.

New Featured Product From Fortress

The Carbon Fiber Stitching Dogs were demonstrated by Steve Marney from Emecole. Stitching Dogs are the first commercially available carbon fiber repair product designed specifically for concrete slabs, floors, driveways or any horizontal concrete surface where a strong and durable repair is required. Stitching Dogs add 1320 PSI tensile to enhance the longevity of a concrete slab crack repair. Ideal for decorative overlay, this product stabilizes the slab for trouble free polymer overlay installation.

Advantages Using Stitching Dogs

- Designed for flatwork
- Adds 1320 PSI tensile to immediate repair area
- More economical than steel
- Non corrosive
- Takes only minutes to install
- Install overlay or continue traffic in 20 minutes
- Simply installs in a saw cut

Your Monthly Report

- Used in conjunction with traditional crack repair materials
- Economical
